

## **Global Maritime Distress & Safety System (GMDSS)**

### **Introduction**

An intensive programme on the operation, compliance, and emergency application of Global Maritime Distress & Safety System (GMDSS) under Safety of Life at Sea (SOLAS) and The International Telecommunication Union (ITU) regulations.

### **Learning Outcome**

1. Operate GMDSS equipment competently
2. Manage maritime distress and safety communications
3. Ensure regulatory compliance and accurate reporting

### **Learning Objectives**

1. Understand GMDSS architecture and regulations
2. Apply distress, urgency, and safety procedures
3. Maintain operational readiness of systems

## **Modules**

1. GMDSS framework and SOLAS compliance
2. Sea areas A1–A4 and system coverage
3. DSC operations and distress alerts
4. EPIRB, SART, NAVTEX operations
5. Inmarsat and satellite communications
6. SAR coordination and RCC interaction
7. Equipment testing, logs, and audits

**Session Dates:** 23 March to 27 March 2026

**Daily Session:** 9:00 am - 4:00 pm

**Locations:** | London | Istanbul | Brussels |

**Category:** Logistics and Specialist Courses
